

RIPE NCC
RIPE NETWORK COORDINATION CENTER

Welcome from the RIPE NCC

CAPIF 3 | Bishkek, Kyrgyzstan

We are a non-profit, membership organisation, established in 1992

REGISTRY

We register IPv4 and IPv6 addresses and ASNs

DATA & TOOLS

We operate Internet measurement tools like RIPE Atlas, RIPEstat and RIS

TRAINING

We provide training and certification on topics like IPv6, BGP, RPKI, the RIPE Database etc

OUTREACH

We work to support local Internet communities like NOGs across our service region

Why We Are Here

To support a secure, stable and resilient Internet

Our goal is ensure a stable, resilient and scalable Internet across our service region.

We are here to help you:

- Secure your Internet routing with RPKI
- Scale for the future and grow your networks with IPv6
- Gather accurate data and provide our analysis
- Develop a vibrant, open and interconnected Internet community

CAPIF 1 in Almaty, Kazakhstan in 2022

Our Engagement in Central Asia

Together we go further

Internet Measurement Days held in Kyrgyzstan and Uzbekistan, planned for Kazakhstan in 2025

IPv6-Driven Digital Internet Summit, Uzbekistan, 2024

Supporting Internet Governance Forums in the region

MoUs with governments to support the development of the Internet

Support the Development of the Internet

Host a RIPE Atlas Probe

RIPE Atlas is our global Internet measurements platform.

Host a probe and contribute to better data and insights

Peer with RIS

Peer with our Routing Information System

Provides BGP data and lets you check routing incidents and trends

Host a DNS Node

Handle DNS queries locally, reducing latency and improving performance by hosting an AuthDNS node.

We serve all reverse DNS zones, not just for RIPE NCC address space.

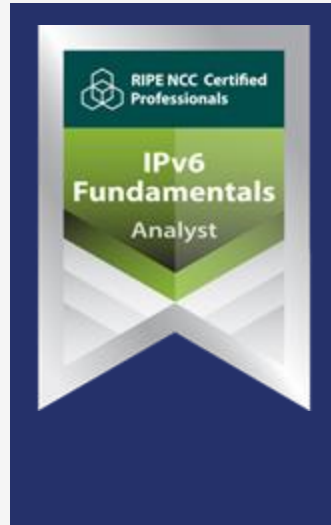

Get Certified: Take An Exam During CAPIF 3

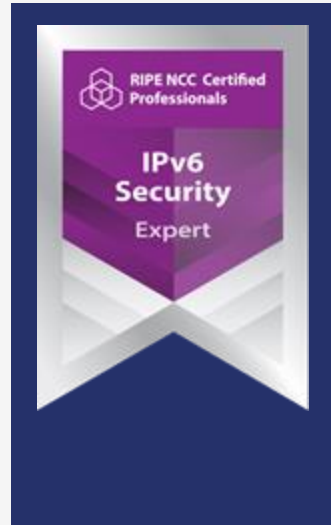

RIPE Database Associate

IPv6 Fundamentals Analyst

IPv6 Security Expert

BGP Security Associate
